Your ODC 420L™ is designed to give you many years of service. Please follow Inflation Instructions, and Care and Maintenance Instructions and Warnings carefully. If you ever have any questions or problems with your ODC 420L™ please call The Creek Company at (970) 879-5221 or E-mail us at info@CreekCompany.com. We are open 9am-5pm, Mountain-Time, Monday-Friday

Your ODC 420L™ is guaranteed against defects in material and workmanship for the life of the product to the original owner. This does not cover damage due to misuse or normal wear and tear.

HIN is located on outboard, starboard side of the hull aft.

Warning:

- 1. Always wear a U.S. Coast Guard approved personal flotation device when in your ODC 420L™**
- 2. The ODC 420L™ is intended for use in still waters only. Never use your ODC 420L™ in moving waters.**
- 3. Never float alone.**
- 4. Always check your ODC 420L™ Air Bladders, Outer Cover and stitching for possible damage before you use your ODC 420L™.**
- 5. Never use your ODC 420L™ if you suspect the Air Bladders, Outer Cover or Stitching has been damaged.**
- 6. Never over inflate your ODC 420L™.**
- 7. Never use your ODC 420L™ without both Air Bladders fully inflated.**

Care and Maintenance:

- 1. In case of puncture, Air Bladder Patch Kit is included.**
- 2. Do not store your ODC 420L™ in direct sunlight.**
- 3. If you are leaving your ODC 420L™ out in the sun for any amount of time, be aware that the heat can increase the pressure inside the Air Bladders to a dangerous level. Let some of the air out of the Bladders if it will be out of the water in the sun for any length of time, or if it is stored in a vehicle, etc.**
- 4. A gain in altitude will increase the pressure in the Bladders also. If you are taking your inflated ODC 420L™ from a low elevation to a high elevation, be sure to let some of the air out of it.**
- 5. For short term storage, we recommend you let some of the air out of your ODC 420L™.**
- 6. For long term storage, we recommend you make sure your ODC 420L™ is completely dry and deflated and stored out of the sunlight in a cool dry area.**

Accessories are available for your ODC 420L™. Ask for them where you bought your ODC 420L™, or visit The Creek Company Store at www.CreekCompany.com

Inflating Your Creek Company ODC 420L™

VALVES

The ODC 420L™ features the Pro Series Push Button Valve on the main bladders (see illustration 3). To open the Pro Series Valve, first remove the valve cap. Then press down on the spring-loaded valve stem and turn it counter-clockwise 1/4 turn. The valve stem is now locked down in the open position, allowing air to move freely in and out through the valve. To close the valve, push down on the valve stem and turn clockwise 1/4 turn. The stem will pop back up, sealing the valve shut. In the closed position, you can still pump air into the chamber, but when you remove the pump, the valve will not allow air to escape. When you're done, screw the plastic valve cap back on to keep water and dirt out of the valve.

INFLATION

Unscrew the plastic Valve Cap (see illustration 3) on the Pro Series Push Button Valve. Push Down on the Valve Stem and turn 1/4 turn clockwise so the Valve Stem pops up into the closed position. Using the included pump and adaptor, insert the adaptor into the valve and turn clockwise 1/4 turn, locking the adaptor in place. Connect the pump/pump adaptor to the Valve Adaptor and inflate until firm. Do not overinflate. When the tube is fully inflated, you'll notice all the wrinkles in the cover will flatten out.

To deflate the tube, push down on the Valve Stem and turn it counter-clockwise 1/4 turn. This locks the valve open for deflation.

Features found on your Creek Company ODC 420L™ (see Illustrations 1, 2 and 3)

1. Pro Series Push Button Valves
2. Insulated Drink Holder
3. Carry Handles (top & bottom)
